

Report
Faculty Enrichment Program
“Understanding Copyrights and Publication Metrics”
May 21, 2022

The IQAC, Janki Devi Memorial College, University of Delhi organized the Faculty Enrichment Program on the topic, “**Understanding Copyrights and Publication Metrics**” on May 21, 2022. The resource person for the webinar was **Prof. Abid Haleem**, Professor of Mechanical Engineering, Faculty of Engineering and Technology, Jamia Milia Islamia. The event was attended by the faculty members and students. 64 participants attended the session. The session began with a welcome address and Introductory remarks by Dr. Shilpa Chaudhary, IQAC Coordinator, JDMC.

Prof. Haleem described Intellectual Property Rights (IPRs) and Copyrights in detail. He explained the importance of understanding the issue of copyrights and the need to honour the copyrights of other authors.

Prof. Haleem then talked about research metrics and citation databases (such as Web of Sciences). He further explained the meaning and relevance of impact factors of journals. He described the calculation of various indices such as H-index and I-index. Prof. Haleem also described various platforms where researchers must open their accounts and keep track of their citations. He encouraged faculty members to produce quality research and publish them in quality journals.

The presentation was followed by a discussion session wherein participants asked several queries related to copyrights, indices and increasing research visibility. Prof. Haleem answered all queries making the session extremely interactive, informative and fruitful. The session ended with a vote of thanks by Dr. Shilpa Chaudhary.

Copyright

Copyright is a type of intellectual property which protects certain sorts of original creative work, including academic articles. Copyright allows the creator of a work to decide whether, and under what conditions, their work may be used, published and distributed by others.

Copyright includes literary and artistic works such as novels, poems and plays, films, musical works, artistic works such as drawings, paintings, photographs and sculptures, and architectural designs.

Research Metrics

Research metrics are quantitative tools used to help assess the quality and impact of research outputs. Metrics are available for use at the journal, article, and even researcher level. However, anyone metric only tells a part of the story and each metric also has its limitations

Scholars have combined standard research metrics, like **scholarly output** and **citation counts**, into formulas to measure and assess author and journal impact in new ways.

Our business

Connect

Open science

Corporate responsibility

Research

We help researchers to make new discoveries, collaborate with their colleagues and give them the knowledge they need to find funding. We help governments and universities to evaluate and improve their research strategies. We help doctors to care for their patients, providing insights for physicians to find the right clinical answers and we support nurses and other healthcare professionals throughout their careers. Our goal is to expand the frontiers of knowledge for the benefit of humanity.

REC ABID HALEEM is presenting

Shortcomings of the h index

- h index is a metric to assess the entire body of scholarly output by an author but is not intended for a specific timeframe
- The h index is insensitive to publications that are rarely cited as meeting abstracts, reviews
- Author name variant issues and multiple versions of the same work pose challenges in establishing accurate citation data for a specific author.
- The h index does not provide the context of the citations.
- The h index is not considered a universal metric as it is difficult to compare authors of different seniority or disciplines
- Self-citations or gratuitous citations among colleagues skew the h index.
- The h index will vary among resources depending on the publication data that is included in the calculation of the index.
- The h index disregards author ranking and co-author characteristics on publications.

Closing remarks..

- Multi-disciplinary/ trans-disciplinary approach in research
- Strong impact of IT and web-enabled technologies on the research process
- Emergence of service-centric approach in publishing
- Authors should know where to publish for maximum visibility and impact
- Kindly note; some articles are published for citations and some to share your original work but we need both
