Program Exit Survey and Program Specific Exit Survey

Program Exit Survey

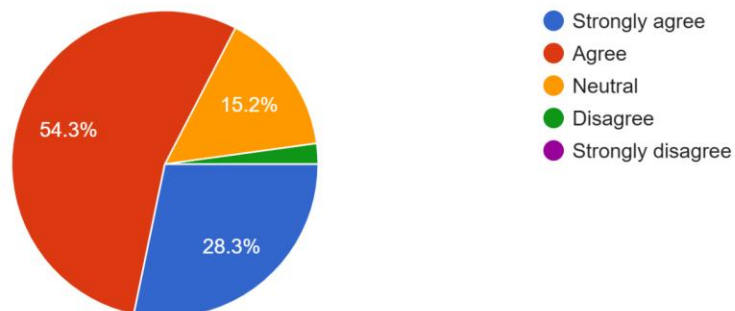

I am better equipped to Engage in Critical Thinking

46 responses

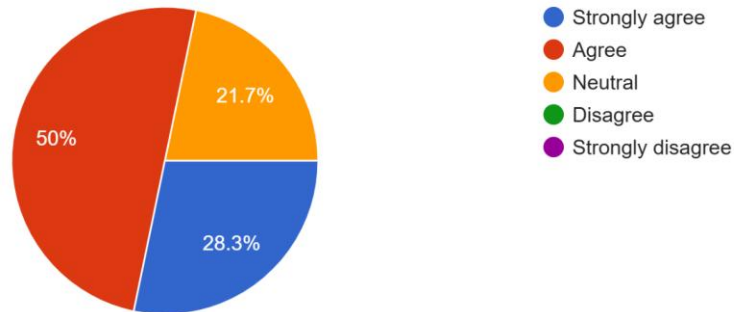

There has been Improvement in my communication skills

46 responses

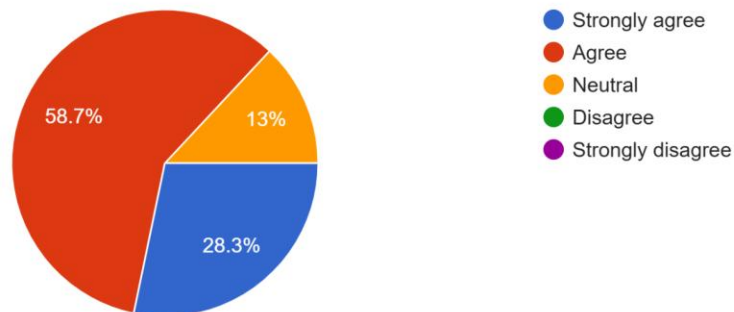

I am better equipped to engage in more and confident social interactions

46 responses

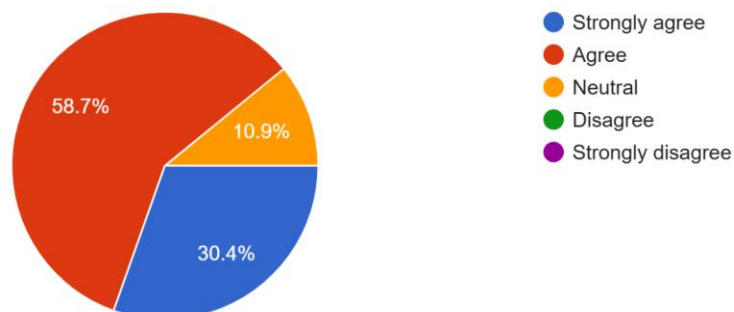

I rate myself as a better and an aware citizen

46 responses

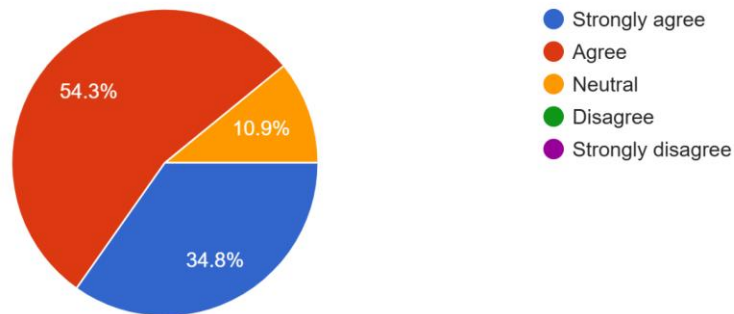

I understand the importance of ethics and values

46 responses

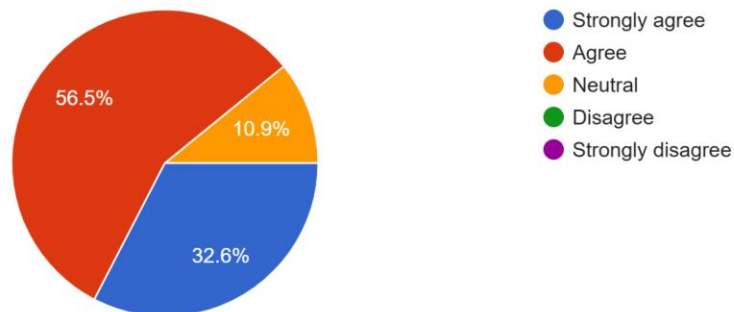

I understand the issues of environment and sustainable development

46 responses

I am equipped to be self-directed and to engage in life-long learning

46 responses

Observations:

83% of students responded that the program helped them to improve critical thinking as well as communication skills. 78% of students said that they feel more confident in social interactions. More than 85% of students agreed that the course also helped them in becoming aware citizens and understanding ethics and values. They were able to understand the issues relating to the environment and sustainable development; and were equipped with self-direction and life-long learning.

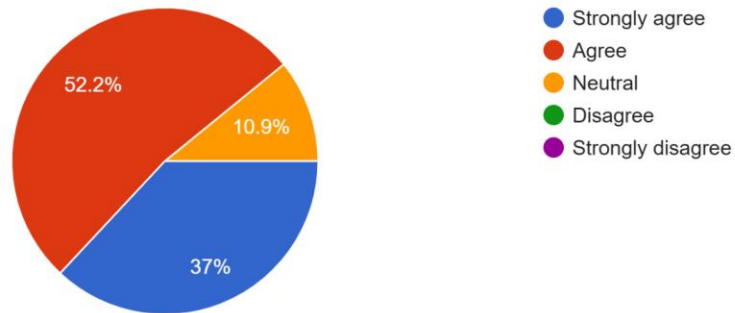

Action Taken Report:

The department looks forward to organizing more sessions and workshops on soft skills to help them gain more confidence in their communication skills and capability to deal with social interactions. Also students will be encouraged to cultivate the spirit of being self-directed and engage in lifelong learning. Students will be encouraged to participate in numerous activities in the college and outside to promote ethics and values in them.

46 responses

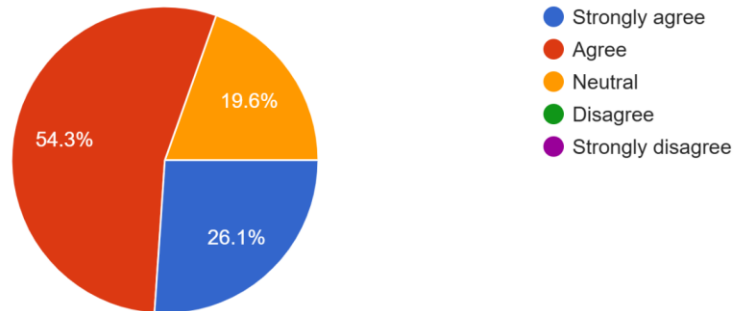

I have learnt the mathematical and statistical techniques necessary for a proper understanding of the discipline

46 responses

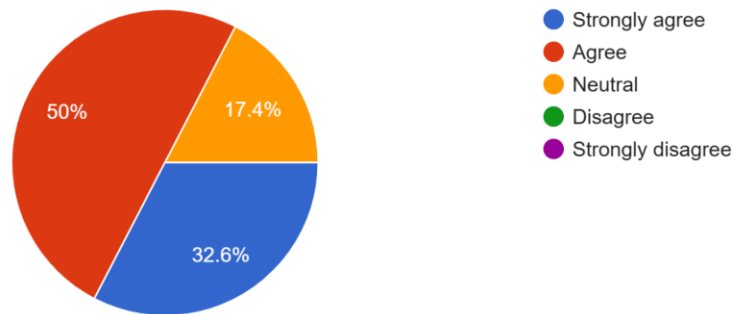

This program gave an introduction to real world economic issues and problems facing the country and the world;

46 responses

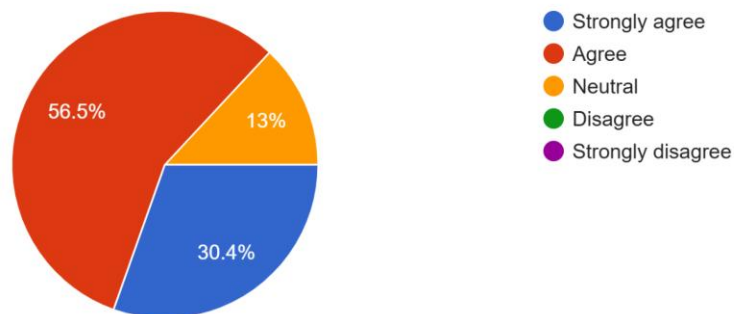

This program provided me the ability to gain an understanding of proper policy responses to economic problems

46 responses

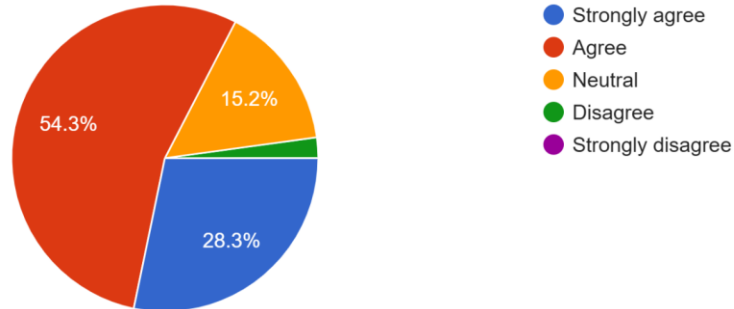

This program trained me to collect primary data and learn sampling techniques

46 responses

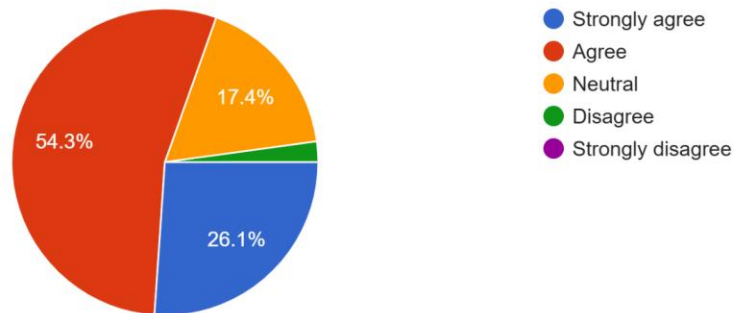

This program helped me learn to use scientific empirical methods to arrive at conclusions about the validity of economic theories

46 responses

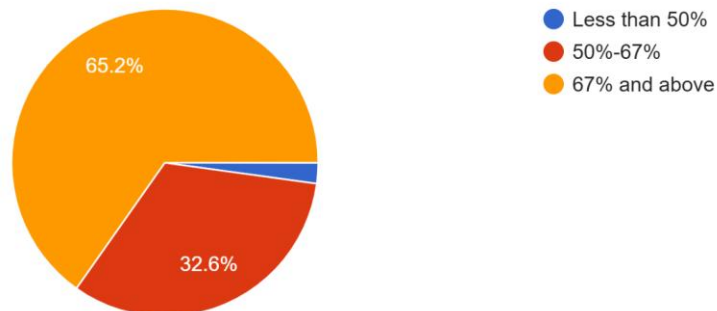

This program trained me in the art of economic modelling

46 responses

How much was your attendance in this program?

46 responses

Observations:

89% of students were able to understand the basic economic concepts and theories. 85% of students learned to apply mathematical and statistical techniques in economics. 80% of students agreed that they were introduced to real world economic issues and problems facing the country and the world. 83% of students agreed/strongly agreed that they gained an understanding of proper policy responses to economic problems. 87% of students agreed/strongly agreed that they were well trained to collect primary data using sampling techniques. Around 83% of students learnt to use scientific empirical methods to arrive at conclusions about the validity of economic theories. 80% students opined that they got well trained in the art of economic modelling

Action Taken Report:

The Department will focus on student-centric pedagogies to help students achieve program outcomes. More Lectures with experts and workshops will be organized on different economics related topics so that students get different perspectives to economic problems and theories. Experiential learning will be encouraged so that students understand concepts better and learn their application as well.
