

Program Exit Survey B.Com.(Hons.) 2025-2026

Report Summary

Based on the responses of 68 graduating students, the B.Com (Hons.) programme has been perceived very positively across both general and programme-specific outcomes. A substantial majority of students agreed that the curriculum enhanced their critical thinking, analytical ability, communication skills, social confidence, and ethical awareness. Students also reported improved understanding of diverse cultures, stronger civic consciousness, and better preparedness for professional and workplace challenges. The programme was particularly appreciated for providing comprehensive knowledge across core commerce disciplines and for fostering managerial capabilities, innovation, and problem-solving skills. SEC and VAC courses were also viewed as effective in developing practical skills and social understanding. Notably, 95.6% of the respondents expressed their intention to continue into the fourth year, reflecting a high level of satisfaction and confidence in the programme.

While the overall feedback is highly encouraging, a noticeable proportion of students remained neutral on aspects such as job preparedness, managerial skill development, research orientation, and communication enhancement. Focused interventions in these areas may further strengthen programme outcomes.

Action Taken / Proposed Action Points

- Introduce additional industry-oriented workshops and certification programmes to enhance employability and job readiness.
- Strengthen internship and experiential learning opportunities through industry collaborations.
- Organize regular communication and professional development sessions focusing on presentation, writing, and interpersonal skills.
- Increase exposure to real-world business problems through case studies, simulations, and live projects.
- Conduct specialized training on leadership, managerial decision-making, and strategic thinking.
- Encourage greater student participation in research projects, conferences, and academic writing activities.
- Enhance the effectiveness of SEC and VAC courses by integrating more hands-on and application-based learning components.
- Establish a structured mentorship and career guidance system involving alumni and industry professionals.
